

.PMPAPP (put into pt printout's to encourage parents to download the PMP app)

.PMPDATA [[of note- for the dropdown options, I had to first create custom drop down options in epic then pull those into my epic dotphrase]]. I can create screen shots of this if needed? However, I don't think that capturing this level of data is part of the current PMP program, is it?

Ohio AAP Parenting at Mealtimes and Playtimes (PMP) Program info:

Growth: Interpretation of the child's updated growth curves indicates the child is {pmpgrowth:25442} [dropdown options were: underweight, healthy, overweight, obese]. The {PMPWFLBMI:25443} [dropdown options were: weight-for-length or BMI] chart was discussed with parents; since their last well child visit there was a {PMPincdecmaint:25444} [dropdown options: increase, decrease, or maintenance of] in the growth curve.

BP: The child's observed blood pressure @BPAWR@ [phrase tells you blood pressure %tile using BP + height entered into chart] was {PMPBP:25445} [dropdown option: normal, elevated, stage 1 HTN, Stage 2 HTN] .

Famhx: Family history was *** collected/updated and reviewed for positive obesity-centric conditions. [*** - trigger to delete if info was collected or type "not" if info was not collected]

AG: Age appropriate PMP anticipatory guidance {PMPAG:25446} [dropdown options- for diet, for activity, for opportunities to improve an identified behavior/habit, unable to discuss due to other priorities] was discussed.

Handouts: The following handouts were provided and discussed with the family: {PMPhandouts:25447} [dropdown options- Age specific, breastfeeding, transition to solids, picky eating, stress free mealtimes, food assistance, meal planning, healthy servings, snacks, healthy bones and teeth, pound of cure, No].

Goal: The family {PMPGoal:25448} [dropdown options- selected a new, revisited a previously set goal] . Plan/goal for change was to *** in the area of *** to address. Since the last visit, family reports *** progress on set goal. We discussed *** as next steps.

Suggested Phrase: .pmpgrowth

Suggested Inserted Statement: "Interpretation of the child's updated growth curves indicates the child is (*insert weight status verbiage of underweight, of healthy weight, overweight or obese*). This (*weight-for-length or BMI percentile*) chart was discussed with parents; since their last well child visit there was a (decrease, maintenance of, increase) in the growth curve."
